

Girl power helps L&S to mix it

L&S Waste Management has launched its ready mix concrete service and it's already creating quite a stir.

As a business renowned for its earth moving and aggregate services to the building and construction industry in the south, L&S Ready Mix Concrete was a natural service to offer customers.

Using proven volumetric batching technology, L&S is able to provide fresh concrete to various mix designs.

Cari Winter and Verity Morley were on hand with their own brand of girl power to help launch the service to companies in Hampshire.

Ian Bradbury, operations manager at L&S Ready Mix Concrete said: "We can't promise the girls will be available every time we deliver concrete to our customers but they've brightened up our official launch!

"There's huge demand already for our service which is very encouraging. Concrete is not dispatched until the client is ready for the pour which ensures fresh quality material is received giving maximum work time. Should time be an issue we can provide an accelerator or a retarder to help with the process."

L&S Waste Management also supplies a wide range of services ranging from waste recycling and treatment, to recycled aggregates, skip hire, wheelie bin collection, and earthmoving services.

Established almost 20 years ago, L&S has grown to become one of the region's most successful waste management organisations employing more than 100 people. In addition to its Portsmouth based headquarters, L&S has further modern waste recycling plants in Fareham and Southampton and operates in excess of 30 waste management vehicles throughout Hampshire, Surrey, Sussex, Wiltshire and Dorset.

Managing director Mick Balch added: "Over the past 20 years we have diversified our service offering and built up an excellent reputation among our customer base in the south. The ready mix concrete division is an exciting new offering."

About L&S Waste

L&S Waste has grown to become one of the leading independent waste management service providers in the heart of southern England.

Operating in excess of 30 dedicated waste collection vehicles throughout Hampshire, Sussex, Surrey, Wiltshire and Dorset, L&S specialises in the collection, treatment and recycling of waste.

L&S provides earthmoving services, skip and roll-on-off containers, wheelie bins, recycled aggregates and ready mix concrete.

With waste recycling depots throughout Hampshire and West Sussex, L&S is able to offer bespoke, cost effective commercial solutions to the problems associated with waste removal.

"There's huge demand already for our service which is very encouraging. Concrete is not dispatched until the client is ready for the pour which ensures fresh quality material is received giving maximum work time. Should time be an issue we can provide an accelerator or a retarder to help with the process."
